Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

Contents

Contributors	хi
Chapter 1 Feature engineering methods	1
Anton Popov	
1 Machine learning projects development standards and feature	
engineering	. 1
2 Exploratory data analysis	. 2
3 Data vs features	13
4 Feature reduction	18
5 Feature selection	18
6 Feature dimensionality reduction	22
7 Concluding remarks	25
References	
Chapter 2 Heart rate variability	31
B. Dhananjay, B. Arya, N. Prasanna Venkatesh, and J. Sivaraman	
1 Introduction	31
2 Literature review	36
3 Results	40
4 Discussion	50
5 Conclusion	52
Acknowledgments	52
References
